

Cascade Windows Manufacturer Certification Statement

Cascade Windows manufactures vinyl-framed window and door systems. Cascade vinyl windows and/or patio doors, when purchased with Solarban® 70XL glass by PPG, incorporated into insulated glass units made with Super Spacer® by Edgetech, and a 90% argon gas mix, meet or exceed the prescriptive criteria established by the IECC for all climate zones in which the windows or patio doors are installed. The same units also meet or exceed ENERGY STAR® criteria and program requirements. In addition, the same units will possess U-values of .30 or lower, and Solar Heat Gain Coefficients (SHGC) of .30 or lower – therefore qualifying under the provisions of the American Recovery and Reinvestment Act of 2009.

This statement also serves to certify that Cascade windows and patio doors, when purchased with the glass options mentioned above, are “Eligible Building Envelope Component(s)” that qualify for the federal income tax credit allowed under Section 25C of the Internal Revenue Code, Notice 2006-06.

Under penalties of perjury, I declare that I have examined this certification statement, and to the best of my knowledge and belief, the facts are true, correct, and complete.

Greg Lambas

Director of Sales and Customer Services
Cascade Windows

This Statement is intended to show that Cascade windows and patio doors, as described, are Eligible Building Envelope Components under the relevant IRC sections. Homeowners should consult their tax advisor to determine whether they qualify for any potential income tax credits.

This statement was issued on March 24th, 2009. Information and codes are subject to change.
